

WHITE MUSTARD (*SINAPIS ALBA*)

SIGNAL

The advantages of SIGNAL

› White mustard is a very fast-growing annual crucifer with a deep taproot. The plant tolerates late sowing, is well suited as a greening and fall intercrop and has some importance as a forage and spice plant. Nematode resistant varieties are used to reduce nematodes in beet crop rotations.

Variety assessment of SIGNAL

Mass growth at the beginning		strong
Tendency to lodging		low to medium
Tendency to blooming		medium

(1 = very low, very early / 9 = very strong, very high, very late)

Source: according to the specifying variety list 2020 issued by the Bundessortenamt
